
DIGITAL GOVERNMENT FOR RESILIENCE PROJECT
IDA Credit 64860

REQUEST FOR STATEMENT OF CAPABILITY

Project Management Consultant for Tax Information System to provide business analytical support

Ref. No.: GD-MOIID-303754-CS-INDV

Project Summary

The Government of Grenada (GoG) has entered into financing arrangements with the World Bank, the proceeds of which will be allocated towards the financing of the Digital Government for Resilience Project (DG4R). The DG4R's approach is geared towards creating an enabling environment to modernize the public service in the delivery of various services through the use of digital technologies thereby providing high-quality services to its citizens while developing literacy and awareness skills amongst its people.

The first component will build the enabling environment that needs to be in place to modernize public service delivery across whole-of-government (WoG). The objective of this component is to establish the technical, institutional, legal and regulatory foundations that constitute the enabling environment to institutionalize digital government.

The second component will leverage this enabling environment to adopt digital technologies that will deliver a group of selected, high-priority services to citizens. This component will build on the foundations introduced under the first component to enable the delivery of selected government digital services.

The third component will introduce a comprehensive package of initiatives to strengthen institutional capacity, coordination, and management in the context of the challenges and particularities of operating in a small island state context. The objective of this component is to strengthen the institutional and human capacity to manage digital government transformation.

Brief Overview of Scope of works:

Overarching responsibilities

- Support the Government of Grenada Ministry of Finance and related departments and agencies in functional, non-functional requirement documents, along with providing hands-on support during implementation of information system.
- Support the management and implementation of the rollout process for a Digital Civil Registry System, Spatial Land Parcel Inventory Systems among others.
- Lead the design and delivery of training programs and provide hands-on support to stakeholders within the Civil Registry and the Lands and Survey Department.

Qualifications

- At least a BSC in the field of Information System, Software Development of related ICT. A Masters will be preferred.
- At least 5 years of directly relevant professional and operational experience working with system implementation, specifically within public service context.
- Expert knowledge and wide recognition in technology adoption risk and risk management planning as it relates to stakeholder who may not be proficient with technology and technology enforcement changes.
- A proven track record of substantial achievements in the field and delivering high-quality advice at the strategic and technical level in the aforementioned areas, as obtained through prior work.
- Good relational, integrative, and communication skills and ability to work with a diverse international team of experts and with government counterparts at all levels.
- Excellent written and oral communication skills with a high command of the English language.
- Proven track record of producing clear and concise analytical reports and presentations within tight deadlines. Prior knowledge of World Bank styles and standards for creating analytical and advisory reports is an asset.
- Possess an aptitude for establishing cooperative relations and sharing technical knowledge with national authorities, as well as capacity to handle sensitive issues with discretion.
- Experience working in countries with World Bank-supported programs and working in the Caribbean region would also be an advantage.
