

JOB OPPORTUNITY

REGULATORY ENGINEER – WATER AND SEWERAGE

JOB SUMMARY

The Regulatory Engineer – Water & Sewerage will play a vital role in fulfilling the Public Utilities Regulatory Commission's mandate to regulate the water and sewerage sectors in the State of Grenada. The selected candidate will be responsible for monitoring, evaluating, and guiding the performance of water and wastewater service providers. This candidate will also contribute to the development of the sector's regulatory framework to ensure compliance with national standards, promote sustainable infrastructure development, and safeguard consumer interests.

KEY RESPONSIBILITIES

- Develop and enforce technical standards for water supply and sewerage systems
- Review and assess utility providers' infrastructure plans, tariffs, and service quality
- Conduct inspections and audits of water and wastewater facilities
- Advise on environmental and public health compliance
- Analyse data and prepare regulatory reports and recommendations
- Collaborate with stakeholders including government agencies, utility providers, and the public
- Support policy development and strategic planning for sector improvement

MINIMUM QUALIFICATIONS AND EXPERIENCE

- Bachelor's degree (Master's preferred) in Environmental Engineering, Civil Engineering, Water Resources Engineering, or a related field.
- Minimum 5 years of experience in water/wastewater infrastructure, regulation, or public utility management.
- Knowledge of Caribbean water standards, environmental laws, and public health codes.
- Strong analytical, communication, and stakeholder engagement skills.
- Professional Engineering registration or eligibility is an asset.

APPLICATION DEADLINE

Applications must be addressed to the Chief Executive Officer, Public Utilities Regulatory Commission, P.O. Box 2443, Queen's Park, St. George's or email office@purc.gd on or before December 5th, 2025.
